I lead our partner team at LTN & Partners and work alongside our consulting and associate teams. I have been with LTN right from the start. It has been a great journey since LTN was formed and I believe we have built a market leading legal recruitment and consulting business and have an amazing group of clients.

In that time the market at the top end has changed significantly and there is no doubt that our firm is perfectly placed to help both candidates and clients to achieve their growth plans in the top tier market. I am particularly interested in building close and long-term relationships with candidates and clients. Career moves between the top US and UK firms are complex, but we believe should be a rewarding experience for both the candidate and client.

I was an IP lawyer, working at both Bristows in London and at Blake Dawson (now Ashurst) in Australia. I am originally from Melbourne but have been in the London market for over a decade. I undertake both contingent and retained partner searches. I act mostly for teams, both small and large and work almost exclusively for the top US firms and a select group of UK firms. When acting for candidates we have better access to leaders of law firms than any other business.
